AIMS AND SCOPE

The international journal of the Japanese Society for Fisheries Oceanography, *Fisheries Oceanography* is designed to present a forum for the exchange of information amongst fisheries scientists worldwide. *Fisheries Oceanography*...

- presents original research articles relating the production and dynamics of fish populations to the marine environment
- examines entire food chains – not just single species
- identifies mechanisms controlling abundance
- explores factors affecting the recruitment and abundance of fish species and all higher marine tropic levels

taxes. Title to all issues transfers FOB our shipping point, freight prepaid. We will endeavour to fulfil claims for missing or damaged copies within six months of publication, within our reasonable discretion and subject to availability

Back issues: Single issues from current and recent volumes are available at the current single issue price from cs-journals@wiley.com. Earlier issues may be obtained from Periodicals Service Company, 351 Fairview Avenue – Ste 300, Hudson, NY 12534, USA. Tel: +1 518 822-9300, Fax: +1 518 822-9305, Email: psc@periodicals.com

Fisheries Oceanography is published by John Wiley & Sons Ltd., 9600 Garsington Road, Oxford OX4 2DQ, UK; Tel: +44 (0) 1865 776868; Fax: +44 (0) 1865 791347.

Journal Customer Services: For ordering information, claims and any enquiry concerning your journal subscription please go to www.wileycustomerhelp.com/ask or contact your nearest office.

FISHERIES OCEANOGRAPHY, (Print ISSN: 1054-6006; Online ISSN: 1365-2419), is published bi-monthly. US mailing agent: Mercury Media Processing, LLC 1850 Elizabeth Avenue, Suite #C, Rahway, NJ 07065 USA. Periodical postage paid at Rahway, NJ. POSTMASTER: Send all address changes to FISHERIES OCEANOGRAPHY, John Wiley & Sons Inc., C/O The Sheridan Press PO Box 465, Hanover, PA 17331. Subscription prices for 2019 are: Premium Institutional: Print & Online: US\$2538 (US), US\$2960 (Rest of World), €1744 (Europe), £1375 (UK). Prices are exclusive of tax. Asia-Pacific GST, Canadian GST/HST and European VAT will be applied at the appropriate rates. For more information on current tax rates, please go to wileyonlinelibrary.com/tax-vat. The price includes online access to the current and all online backfiles to January 1st 2013, where available. For other pricing options, including access information and terms and conditions, please visit www.wileyonlinelibrary.com/access.

Delivery Terms and Legal Title:

Where the subscription price includes print issues and delivery is to the recipient's address delivery terms are Delivered at Place (DAP); the recipient is responsible for paying any import duty or

FISHERIES OCEANOGRAPHY—Instructions to Authors

For more comprehensive instructions, see the web version at [http://onlinelibrary.wiley.com/journal/10.1111/\(ISSN\)1365-2419/homepage/ForAuthors.html](http://onlinelibrary.wiley.com/journal/10.1111/(ISSN)1365-2419/homepage/ForAuthors.html)

Submission of manuscripts

Please submit to the appropriate regional editor:

Editor-in-Chief: Steven J. Bograd – South America; Shin-ichi Ito – Asia; Martin Lindegren – Europe and Africa. Dr. J. Runge – North America and Oceania. Book reviews and communications about book reviews should be sent to the Editor-in-Chief.

Manuscripts should be submitted electronically via the online submission. Fisheries Oceanography accepts articles for Open Access publication. Please visit <http://olabout.wiley.com/WileyCDA/Section/id-828081.html> for further information about OnlineOpen. The use of an online submission and peer review site enables immediate distribution of manuscripts and consequentially speeds up the review process. It also allows authors to track the status of their own manuscripts. Complete instructions for submitting a paper are available online and below. Further assistance can be obtained from Stephan Druskat at the Editorial Office. Please email: sdruskat@wiley.com

Research papers should be between 3000 and 7500 words in length (6–15 journal pages); Reviews should not exceed 6000 words (12 journal pages); and Short Communications should not exceed 2000 words (4 journal pages).

Manuscripts must be submitted exclusively to *Fisheries Oceanography*. It is a condition of publication that authors grant John Wiley & Sons Ltd the exclusive licence to publish all articles including abstracts.

Fisheries Oceanography is covered by Wiley Blackwell Publishing's Early View service. Early View articles are complete full-text articles published online in advance of their publication in a printed issue. Articles are therefore available as soon as they are ready, rather than having to wait for the next scheduled print issue. Early View articles are complete and final. They have been fully reviewed, revised and edited for publication, and the authors' final corrections have been incorporated. Because they are in final form, no changes can be made after online publication. The nature of Early View articles means that they do not yet have volume, issue or page numbers, so Early View articles cannot be cited in the traditional way. They are therefore given a Digital Object Identifier (DOI), which allows the article to be cited and tracked before it is allocated to an issue. After print publication, the DOI remains valid and can continue to be used to cite and access the article.

Permission must be obtained from the relevant publisher and author for any extensive quotation of text and copying or re-drawing of figures or parts of figures from other sources. These must also be acknowledged in the text or figure legend.

Presentation of Manuscripts

- All text should be in Times New Roman double line-spaced with 30mm right and left margins.
- The title, authors' names, addresses, identified corresponding author, contact information (including email) and running title should all be left aligned on a separate first page (see web version).
- The title should be in 14pt bold lower case, authors in 12pt bold capitals and addresses in 12pt italic lower case.
- Where there is more than one author's address, add a superscript following each author's name and a corresponding numeral preceeding each address.
- Give key words after the **Abstract**.
- Main headings should be in 12pt bold capitals left aligned, each to begin on a new page.
- Sub-headings should be left aligned in 12pt italic lower case.
- Do not number sections.
- The main text should be in 12pt and should be right justified.
- Do not leave a line space between paragraphs. Instead, indent the first line of each new paragraph (except the first paragraph of each new section).
- Page numbers should be centred at the bottom of the page.
- All organisms should be identified by taxonomic name (in italics) the first time they are used.
- Give all abbreviations in full the first time they are used.
- All formulae should be numbered consecutively in brackets at extreme right of the page.

Language

All papers submitted must be written in English. American or UK spelling can be used, but must be consistent throughout the paper. It is the responsibility of authors to ensure proper English usage throughout their paper. See web version for details.

Units

Use SI units throughout, where possible. For non SI units (e.g. knots, Svedrups) write the unit in full and define the abbreviation used at first mention, e.g. "at a towing speed of 2 knots (kn, 1 knot = 0.5m s⁻¹)".

Generally, use spaces between the quantity and the unit, but not between the unit and any raising power (e.g. 13 kg m⁻²).

Salinity

Salinity is dimensionless with no units; psu, ppt, or similar should not be used. For example, "the salinity was 35.26 at the surface spawning took place in water of salinities >30.0". Table headings, figure legends etc. should appear just as - Salinity.

Figures

Please include a list of figure titles, double spaced, on a separate page.

Figures should be referred to as e.g. Fig. 2, Fig. 2b,c or Figs 9 and 10 - whether in the main body of the text or in brackets, except at the beginning of sentences where it is in full e.g. Figure 9. All illustrations and lettering should be capable of reduction to the final size without loss of clarity or legibility. Ensure consistency in fonts, line thickness and style. Very thin lines do not reproduce clearly. Avoid using tints, a coarse stipple reproduces more clearly.

Digital versions of figures should be submitted in TIFF or EPS format. Please address queries concerning the filetypes for submission to sdruskat@wiley.com.

It is the policy of Fisheries Oceanography for authors to pay the full cost for the reproduction of their colour artwork. Consult http://media.wiley.com/assets/7130/56/SN_Sub2000_F_CoW.pdf for further information on colour charges.

In the full-text online edition of the journal, figure legends may be truncated in abbreviated links to the full screen version. Therefore, the first 100 characters of any legend should inform the reader of key aspects of the figure.

Tables

These should be typed without vertical lines, each on a separate page and have complete but brief headings. Only use horizontal lines to separate the column headers from the main table and at the top and bottom of the table; do not use horizontal lines to separate each line of data. Tables should be numbered consecutively in the order in which they appear in the text and should not duplicate material in the text or figures. The first letter of text phrases used as column and row headers should be capitalised. The "Table number" should be in bold but the remainder of the text of the heading is to be in standard weight. e.g. **Table 2.** Correlation coefficients and significance levels.

References

Only full articles which have been published or are 'in press' may be included as references. Papers 'submitted' or 'in prep.' are not permitted. In the text, unpublished studies should be referred to as such or as a personal communication together with an abbreviated address of the source (e.g. R. Swain, Vancouver University, USA, pers. comm.). References should be inserted in parentheses, as follows: (Cushing, 1989; Young *et al.*, 1986). The reference list should be in alphabetical order according to first-named author. Papers with two authors should follow those of the first-named author, arranged in alphabetical order according to the name of the second author. Articles with more than two authors should follow in chronological order. All authors' names and the title of the article must be included. Any web references must include the date of last access. **Ensure that all references occurring in the text are present in the reference list and that correspondingly there are none that are found solely in the reference list.** Standard abbreviations of journal titles should be used, following the *American National Standard for Abbreviations of Titles of Periodicals*. For more detailed instructions, please see web version.

Proofs

Proofs will be sent via e-mail as an Acrobat PDF (portable document format) file. Full instructions will be provided when the proofs are ready. Proofs should be returned within 48 hours of receipt.

Offprints

Free access to the final PDF offprint will be available via Author Services only. Please therefore sign up for Author Services to access the article PDF offprint and enjoy the many other benefits the service offers. Additional paper offprints may be ordered online. If you have queries about offprints please email www.sheridan.com/wiley/eoc

Digitisation of Fisheries Oceanography

An agreement has recently been reached for us to digitise the entire run of *Fisheries Oceanography* back to volume one, issue one.

The back files, which have been defined as all of those issues published before 1997, will be sold to libraries as part of our Legacy Sales Programme and hosted on the Wiley Online Library website.

Copyright of all material will remain with the rights holder. Contributors: please contact the Editor if you do not wish an article from *Fisheries Oceanography* to be included in this digitisation project.

Contents

ORIGINAL ARTICLES

- 241 Effect of ENSO on the distribution and concentration of catches and reproductive activity of anchovy *Engraulis ringens* in northern Chile
C. Hernández-Santoro, M.F. Landaeta and J. Castillo Pizarro
- 256 Response of Scotian Shelf silver hake (*Merluccius bilinearis*) to environmental variability
D. Reed, S. Plourde, A. Cook, P. Pepin, B. Casault, C. Lehoux and C. Johnson
- 273 Energy dynamics of subyearling Chinook salmon reveal the importance of piscivory to short-term growth during early marine residence
M.N.C. Litz, J.A. Miller, R.D. Brodeur, E.A. Daly, L.A. Weitkamp, A.G. Hansen and A.M. Claiborne
- 291 Modelling the impacts of environmental variation on habitat suitability for Pacific saury in the Northwestern Pacific Ocean
Y.-J. Chang, K.-W. Lan, W.A. Walsh, J. Hsu and C.-h. Hsieh
- 305 Study of sardine (*Sardina pilchardus*) regime shifts in the Iberian Atlantic shelf waters
Á. Cabrero, G. González-Nuevo, J. Gago and J.M. Cabanas

- 317 Bottom boundary layer cooling and wind-driven upwelling enhance the catchability of spanner crab (*Ranina ranina*) in South-East Queensland, Australia
D.M. Spencer, I.W. Brown, M.J. Doubell, C.J. Brown, A. Redondo Rodriguez, S.Y. Lee, H. Zhang and C.J. Lemckert

SHORT COMMUNICATION

- 327 Movement and thermal niche of the first satellite-tagged Mediterranean spearfish (*Tetrapturus belone*)
M.C. Arostegui, C.D. Braun and P. Gaube

ORIGINAL ARTICLES

- 334 Spatial variability in ocean-mediated growth potential is linked to Chinook salmon survival
M. Henderson, J. Fiechter, D.D. Huff and B.K. Wells
- 345 Climate effects and bottom-up controls on growth and size-at-age of Pacific halibut (*Hippoglossus stenolepis*) in Alaska (USA)
K.K. Holsman, K. Aydin, J. Sullivan, T. Hurst and G.H. Kruse

Printed in Singapore by Markono Print Media Pte Ltd
Fisheries Oceanography is covered by BIOSIS, Current Contents, Ecological Abstracts, Oceanographic Literature Review, GEOBASE and FISHLIT.
